WHY WE EXIST

With over hundred humanitarian and development Organizations delivering humanitarian and development Programming in Somalia, a need to provide real time consultancy support ranging from quality evidence generation to policy and strategy development is becoming eminent to help institutions deliver their mandate and adapt to prevailing conditions in the context. Reimpoweris here in pulling together experts to help fill this priority for our clients to achieve impactful quality and impactful services for Somali people.

About Us

Reimpower, established in December 2018, provides a wide range of consulting services in Somalia and Somaliland. Our services include studies and evaluations, monitoring and supervision, third-party monitoring, baseline surveys, impact evaluations, mid-line and end-line project assessments, special studies, research, capacity building, organizational capacity assessments, and translation/proofreading. We specialize in advising stakeholders on designing and implementing evidence-based, contextually appropriate programs for vulnerable populations.

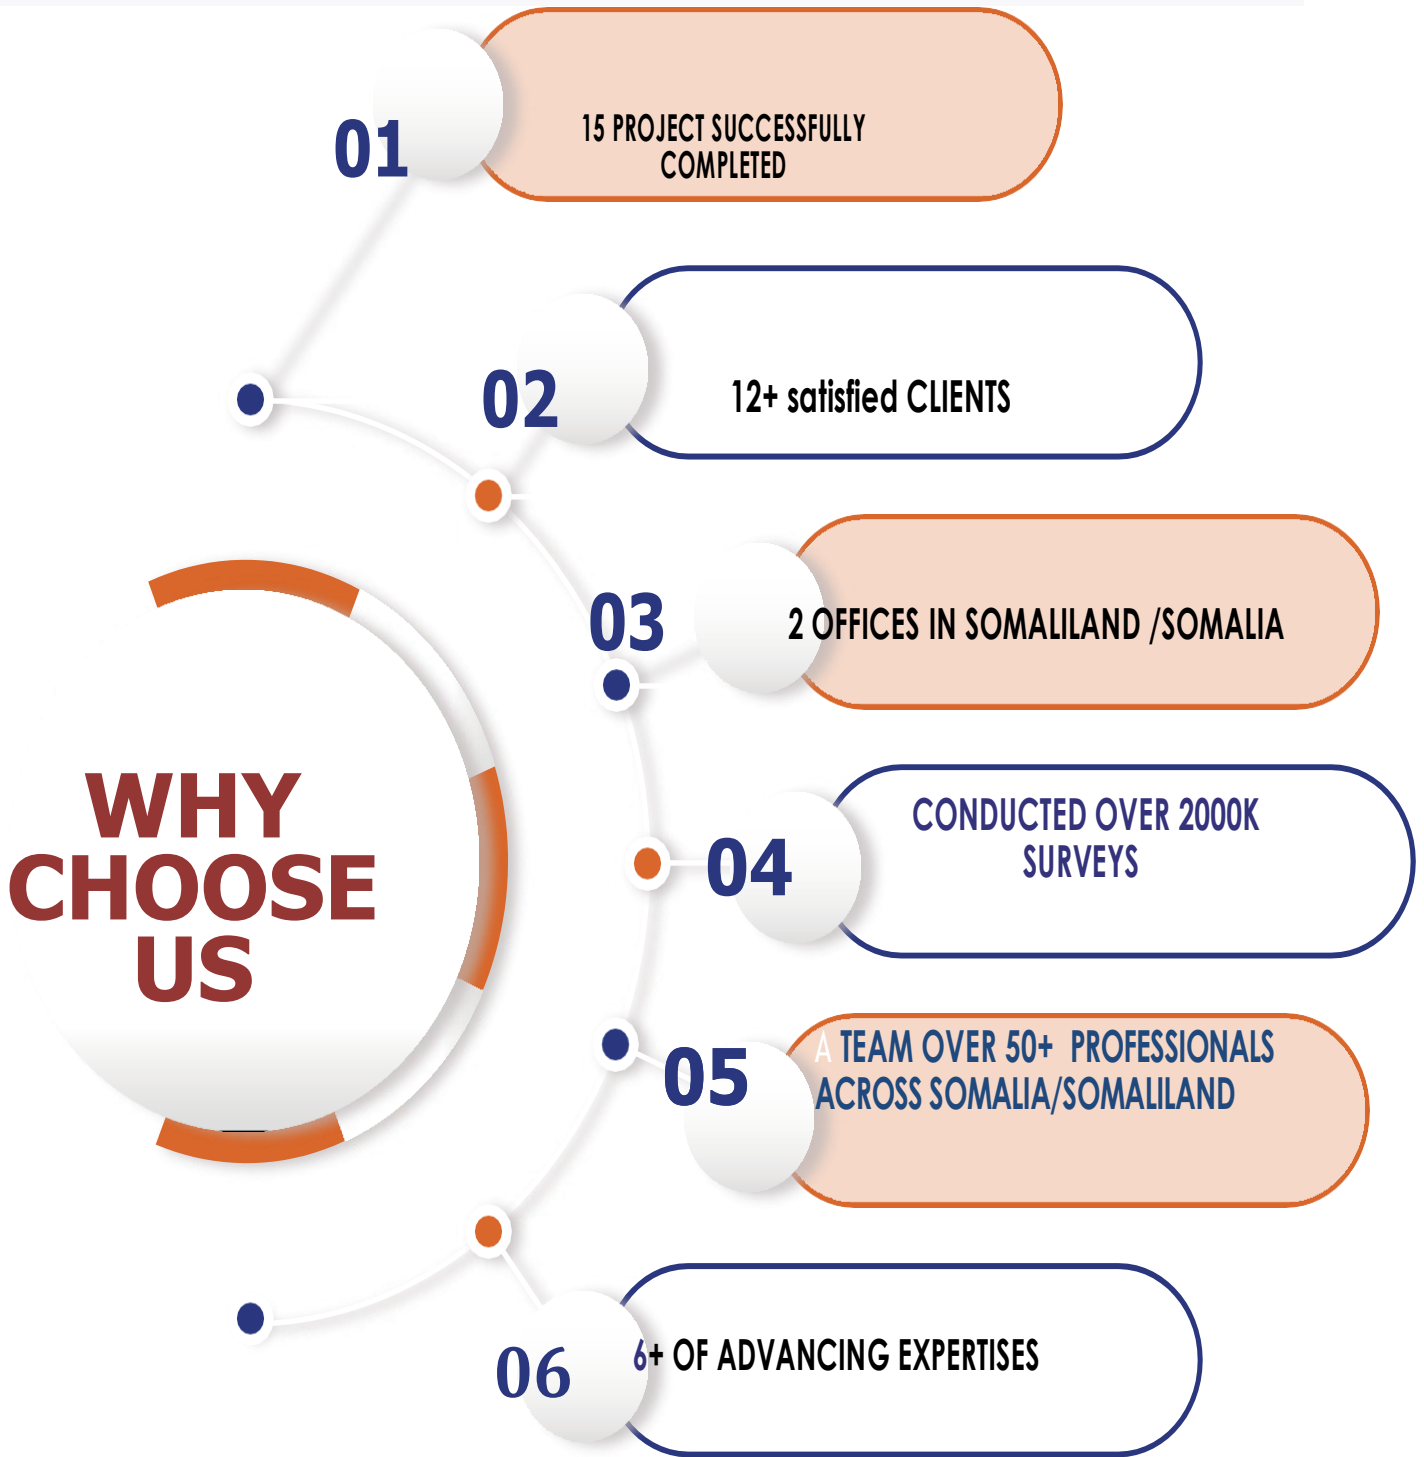

Our collaborative, iterative research approach integrates design assessments and desk studies, generating robust evidence syntheses essential for effective, purpose-driven interventions. With a client-centric methodology, we deliver high-quality, reliable insights that foster positive change and resilience within communities. Committed to closing the learning loop, we place affected communities at the center of our research and programming efforts. Reimpower is dedicated to empowering local populations and creating sustainable development solutions, making us your trusted partner for meaningful, evidence-based programs in Somalia and Somaliland.

The term 'Reimpower' is referred to as "accelerating to the next level" and is used to symbolize "leveraging for impact". We believe that evidence driven decisions has to be made through a rigorous, iterative and context-based evidence generation to design a fit for purpose interventions.

Reimpower is a social enterprise that creates experiences and an environment where pool of experts with wide array of humanitarian and development expertise provides cutting edge consultancy services to private, public and humanitarian/development organizations in Somalia and Somaliland

We are passionate about leveraging the work of our clients with innovative, technical and experience driven approaches. We are deliberate in our aim to bridge the evidence and knowledge generation gap in the Humanitarian/Development sector with the use of multiple tools and approaches that complement one another.

The following are some of the thematic sectors that we have profound experience on and offer leading consultancy services where we offer research, technical assistance and direct Programme implementation.

Economic Resilience including Livelihoods, TVET, business support and access to financial services for the marginalized communities.

Gender Justice and Inclusion: Including rolling out gender sensitive assessments, protection, and support to persons with disabilities.

Climate Adaptation, Anticipatory, Early Warning and Early Action Programming- that promote coping mechanisms, recovery, livelihood & ecological resilience & information for climate change adaptation.

Durable Solutions- Assessing underlying marginalization of people living in IDPs, migration patterns and pathways to IPDs integration into local systems.

Public Policy and Strategy Development including Gender development, Youth policy, durable solutions strategy and economic/income inequality policies.

Digital development including setting up curated digital platforms for social impact.

Budgeting and Financial Reporting including auditing services.

Systems Thinking and co-creation are some of our cross-cutting tools for identifying population marginalization. This way, we users and other social players at the center of our research framework to co-create or co-assess the social problem and pick insights that resonate to clients or audience needs.

Reimpower monitoring and evaluation and research team leverages a suite of cutting-edge digital data collection platforms, including ODK, Kobo Toolbox, SurveyCTO, and SurveyToGo, to enhance the quality and efficiency of ourfield research. We further combine quantitative analysis in tools like STATA, PowerBI, and SPSS, with qualitative coding in NVivo, to deliver comprehensive, evidence-based evaluations for our clients.

VISION

A leading social enterprise promoting evidence harvesting, innovation and curated, fit for purpose consultancy services in Somalia and Somaliland

MISSION

Advancing the humanitarian and development sectors with innovative, evidence-driven strategies and hands-on support, we bridge the gap between data and action to develop effective, context-specific programs

GOAL

Combining research, evaluations and innovative partnerships with Public and Private entities to inform new economic and social development models that helps move Somali people move out of poverty and inequality.

OUR SERVICES

Third-Party Monitoring

Given the challenging operating environment in Somalia and Somaliland, Reimpower leverages our local presence to provide third-party monitoring services. We collect and share up-to-date program data, enabling our clients to make timely, evidence-based decisions regarding their ongoing initiatives.

Environmental and Social Impact Assessments

We identify environmental and social risks, and develop mitigation strategies for development projects across sectors.

Baseline Surveys and Impact Evaluations

We establish robust pre-project baselines through high-quality data collection. This allows us to accurately measure progress and long-term impact of our clients' interventions.

Organizational Capacity Assessments

We diagnose skills and system gaps using specialized tools, informing the design of customized capacity building initiatives.

Midline and End-line Evaluations

As programs advance, we conduct thorough midline and end-of-project evaluations to generate evidence on outcomes, capture lessons learned, and inform future programming

Special Studies and Research

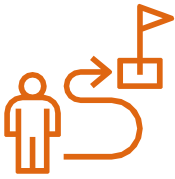

Reimpower carries out contextual research and focused assessments to ensure our clients' decisions are grounded in empirical field-level data.

Organizational Capacity and Trainings and Development

We design and deliver customized capacity building initiatives to address the specific needs of our clients' teams and systems.

Translation and Proofreading

In addition to our core technical services, Reimpower provides professional translation and proofreading support across a range of languages.

HOW WE FULFILL OUR PURPOSE

Human Centered Design

Inspiring sessions for designers and innovators to prototype solutions for social impact through human centered steps

Technology

Using technology to aid our work in the entire cycle of our work including tools design to data analysis and reporting.

COMPANY TRACK

YEAR	CLIENTS	DESCRIPTION
May 2024- Ongoing		<p>Translation of national curriculum childcare and youth development under the support of (Leave no youth behind project) funded by Danida</p> <p>Reimpower was recently engaged by UOH, in partnership with the University of Hargeisa, to translate a national curriculum for childcare and youth development under the support of (Leave no youth behind project) funded by Danida. Our team of linguists ensured the curriculum content was accurately translated and culturally adapted for the local context.</p>
Sept 2022		<p>Baseline Survey-Gender in Emergencies- OXFAM.</p> <p>This is a baseline assessment to provide contextual analysis of the voice, influence, and role of women in humanitarian leadership and decision making. The baseline report will document roles and influences of different stakeholders including INGO's, WROs, CBOs, traditional and religious leaders and community, men and women to increase women's leadership in emergency situations.</p>
June - July 2022		<p>Identify Capacity Needs Assessments of Women's Rights Organizations- Sanaag Region. June- July 2022, Nagaad Network.</p> <p>We had commissioned a substantive assessment of women's right organizations, gaps and development plans to deliver their women's leadership mandates.</p>
July 2022		<p>Identifying Capacity Needs of Women Right Organizations- Marodijeh region, Nagaad Network-Somaliland. July 2022.</p> <p>We have done an identical assessment to the above research about Women's right organizations in Marodijeh region and their gaps which had subsequently resulted in developing a robust- client based capacity development gap.</p>

<p>March 2022</p>		<p>Labor Market assessment on Future/Market Driven Skills about Investable Business Opportunities in Burao, Somaliland, Candlelight, March 2022.</p> <p>We have been commissioned to roll out a comprehensive study about viable enterprises and employment creation sectors that could be oriented to youth and women by Candlelight livelihood/economic empowerment programming. We have developed a comprehensive study framework and harvested information from various stakeholders and desk study sources to develop a cutting-edge research report about investable business opportunities for youth and women economic empowerment.</p>
-------------------	---	--

<p>December 2021</p>		<p>Youth Led Mid-Term Evaluations-Work in Progress! OXFAM</p> <p>December 2021. Reimpower was commissioned to roll out a youth led evaluation about the Work in Progress! Project and has used talented Somali youth researchers to roll out a youth sensitive evaluation aimed at garnering the project progress through a rigorous and iterative data collection and consultation steps with project stakeholders. The project focuses on creating economic empowerment opportunities for young people in Somalia and does this through a multiple and complementary results (Skills development, entrepreneurship and advocacy and influencing for an enabling employed ecosystem).</p>
<p>July 2021</p>		<p>Report writing Training for Local Implementing Partner in humanitarian nexus.</p> <p>Reimpower commissioned a report writing training for Oxfam supported local Nexus partners to develop their reporting and story documentation skills. These also included organizations working on women's economic and social development mandates in Humanitarian setting.</p>
<p>March 2021</p>		<p>Challenging Harmful Attitudes and Norms for Gender Equality in Somalia. April 2021, Save the Children Somalia.</p> <p>The study focused on assessing the structural and social norms related barriers that impede gender inequality in Somalia.</p>

<p>June 2020</p>		<p>Youth-UP Mid-Term Evaluations, Mercy-Corps, June 2020.</p> <p>Reimpower had recently carried out a mid-term evaluation about the intermediary impact of youth Shift Project implemented by Mercy Corps to the adolescents and youth in Somalia and Somaliland. This is a multiyear project aimed at creating economic opportunities for youth and women and more specifically, youth from disadvantaged households who lost their income due to harsh climatic conditions and economic inequalities in cities.</p>
<p>June 2020</p>		<p>Evidence Synthesis on Matters Affecting Young People's Access to financial investments. Funded by UNICEF.</p> <p>Reimpower carried out extensive research on matters affecting young people's access to financial investments and developing a road map towards increasing young people's access to financial opportunities including access to loans/investments from financial institutions in Somalia. This research was conducted in June 2020. The research clearly pinpointed key cultural, contextual and financial barriers affecting young people's availability in the investment chain with more women being at the receiving end than men. Recommendations were also put forward as to how to create sustainable collaboration and synergy with existing financial schemes including small micro-finances run by existing community institutions and banks.</p>
<p>February 2020</p>		<p>Mapping out Youth Policies and women's empowerment policies and Strategies in Somaliland.</p> <p>This is a mapping exercises for SOS with the purpose of identifying existing desk strategies and policies affecting young women's economic empowerment</p>
<p>August 2021</p>		<p>Islamic Relief Somaliland. This baseline evaluation was commissioned to inform initial livelihood conditions of target communities for the project. The assessment provided substantive baseline information by looking at different livelihood indicators including income per day, available livelihood assets, market conditions, community resilience level and potential actors rolling out livelihood interventions in the country.</p>
